

Landscape Materials

The Classic black woven needle-punched fabric

Our Restrictor Fabric

Exceeds competitor's water flow rate.

Our 'Restrictor' landscape is favorite of classic landscape people. The black woven needle-punched fabric offers excellent strength and toughness and a very high degree of UV resistance. The consistency of the needle-punched openings successfully restricts weed growth and freely allows water penetration and air exchange with the soil.

Ideal Applications:

Landscape weed and erosion control.
 Patio and Stone/Paver/Sidewalk underlayment.
 Install under wood decks.
 Under blind drains.
 Between soil and aggregate.

Product Advantage:

Exceptional toughness and tensile strength.
 Highly UV resistant.
 Easily conforms to landscape contour.
 Very effective weed and erosion control.
 Consistent water and air permeability.

*Available as commercial size rolls and retail pallet displays.
 Both share the same physical properties*

Physical Properties

ASTM D 3776	Basic Weight	4.8 oz/y ² (g/m ²)
	Material	Woven Needle-Punched Polypropylene
ASTM D 4632	Grab Strength	100 x 60 lb
ASTM D 4632	Grab Elongation	15%
ASTM D 4533	Trapezoidal Tear	70 x 60 lb
ASTM D 3786	Mullen Burst	285 psi
ASTM D 4833	Puncture	50 lbs
ASTM D 4991	Flow Rate	12 gal/gpm/ft ²
ASTM D 4355	UV Stability	>70%/2500 hrs

Commercial role sizes available:

Width	L/Ft/Roll
3'	250'
4'	250'
6'	250'
8'	250'
12'	250'

3', 4', 6' & 8' Rolls are 10 per pack.
 12' Rolls are 5 per pack.

Retail pallets available:

3' x 50' rolls

12 rolls per display · 6 displays per pallet · 72 rolls

3'x 100' and 4'x 100'rolls

6 rolls per display · 6 displays per pallet · 36 rolls

Fabric Swatch attached.
