“FAMILY OF WINNERS”

Available sizes:

6'x100'

6'x300'

6'x500'

Our fabric features polyester fibers spunbound into a swirling web-like pattern. The result is superior fiber distribution creating a unique weed prevention fabric. The process accounts the exceptional strength-to-weight ratio. The fabric's natural qualities offer exceptional ultra violet stability and unequaled water and air permeability. This fabric is a must for serious landscapers.

Product Advantage:

Retards weed growth with a barrier between mulch, rock and soil. It allows water, air, herbicides, fertilizer and insecticide to flow into the soil. It also lends insulation to root systems against sudden temperature changes and minimizes erosion and loss of mulch due to soil intrusion. This fabric is chemically inert; resists mildew, rotting and insect invasion. Reduces plant bed maintenance and cuts back the need for watering. Maintains moisture better.
