LANDSCAPE FABRICS & PINS

Our commercial grade fabric now comes in convenient display packs! This bulk packaging allows commercial weight fabric to sell at price points that compete with lighter weight and inferior fabrics. We designed our fabrics for the homeowner or a commercial landscape company. It can be used in various applications such as: Landscape fabric, drainage fabric, soil separation fabric, as patio underlay or as root guard along sidewalks. Our Pallet Pak includes commercial grade fabric only and can be displayed in individual boxes or as a six pack unit.

Pallet Pak Features

- ⇒ Packed six cases per pallet
- ⇒ Each case protected by corrugated cover carton
- ⇒ May display individually or as one master unit

EROSION CONTROL PRODUCTS

With a production capacity of over 10,000 units per week, US Erosion Control Products has become one of the world's largest manufacturers of Erosion Control Blankets, Wattles, Filter Socks & Coir Logs. Whether it's Excelsior Wood Fiber, Wheat Straw or Coconut, our state-of-the-art facilities, staffed by a dedicated team of professionals, produces the highest quality, affordable line of Erosion Control Products in the USA!!

DOT & COMMERCIAL SILT FENCE

Silt Fence fabrics are designed specifically to reduce soil sediment run-off from or into protected areas. They function in a manner similar to a sedimentation basin in which water is allowed to filter through the fabric while suspended silt particles settle to the ground. This restricts the loss of costly soil from the site while permitting the water to drain effectively. These fabrics are made of polypropylene with ultraviolet stabilizers to resist degradation caused by exposure to sunlight. Polypropylene is one of the most inert polymers available and highly resistant to commonly encountered soil chemicals, mildew and bacteria. There are several styles of material available to meet your specifications. Call for availability.

CONSTRUCTION GRADE PRODUCTS

Whether you are constructing a roadway, parking lot, designing an erosion control plan, or planning a drainage system, our construction fabrics are a proven benefit to your project. Our construction fabrics will meet or exceed all DOT specifications and certification is available. For affordable, quality Geotextiles, call us today.

Non Woven Fabrics have a random, three dimensional pore structure and are highly water permeable, as is necessary in many geotextile end uses. A wide range of fabric weights ranging from 4 oz. to 16 oz. is offered to meet the requirements of various Non-woven applications. Our **Woven Fabric** is woven from filaments of isotactic polypropylene and are rot proof, resistant to most chemicals and virtually unaffected by acids and alkaline.

NON WOVEN GEOTEXTILES

<i>Item</i>	<i>Size Each</i>
